

Nessy

An agent harness framework
for Java, with a sea monster on
the front.

This guide covers how to use Nessy's mascot, mark, colors,
and words. It exists so the project looks like one project
everywhere it shows up: repo, docs, slides, stickers.

01 — CHARACTER

She surfaces, she's friendly, she's wearing the harness

Nessy is the mascot for the Nessy project. The name
works twice: a harness for agents, and a monster
from a loch that has been photographed badly for
ninety years. The mascot leans into the second
reading so the first one is easier to remember.

NON-NEGOTIABLE FEATURES

Front-facing pose · center head fin · broad
rounded snout · large eyes · closed smile ·
harness with N badge

SHE IS

Curious, capable, a little goofy. Happy to be
looked at.

SHE IS NOT

Scary, sleek, aggressive, or a generic dinosaur.
No fangs, no glowing eyes.

She is drawn front-facing, curious rather than fearsome, half out of the water. The leather harness with the brass **N** badge is the joke and the identity at once. Keep it whenever the size allows.

Nessy is **she/her** in all project copy.

Three levels of Nessy

Pick by size and by how much personality the surface can carry. Every mark is a crop of the same painting, so they never drift apart: the badge is the original painting cut out of its background, keeping the ring exactly as drawn. Her crest breaks above the ring and the ripples spill below it — she sits on top of her border, never inside it. Keep that overlap in any future redraw; it is what stops the badge reading as a stock circle avatar.

Full mascot

README hero art, launch posts, blog headers, decks, stickers, conference banners.

≥ 240px

Nessy

Logo lockup

Routine branding: docs headers, slide corners, site nav, sponsor walls. Stacked version for narrow space.

≥ 120px wide

Micro mark

Favicons, avatars, app icons. The crop tightens to her face and the ring thickens so she survives 16px.

16 – 96px

Give her room to surface

½ badge

Nessy

Minimum clear space on all sides is half the diameter of the badge. Nothing enters it: no text, no rules, no other logos, no photo edges.

Light backgrounds

Full-color badge on cream, white, or Loch Mint.

Dark backgrounds

Reversed badge on Deep Teal or dark photography.

One color

Screen print, embroidery, laser etch, single-ink docs.

Eight things not to do to her

Don't stretch

Scale proportionally, always.

Don't rotate

She stays level and front-facing.

Don't recolor

Use the supplied variants.

No effects

No glows, bevels, or heavy shadows.

No busy backgrounds

Flat brand color or a calm photo.

Don't crop the badge

Whole badge, crest and ripples included.

Don't rebuild the lockup

Use the supplied logo files.

Don't shrink the full mascot

Below 240px, switch to the badge.

Loch water and tack leather

Every color is sampled from the mascot painting. The teals do the work; leather and brass are accents that should stay rare — a buckle, an underline, one highlighted number.

Deep Teal

#0A3644

Type, outlines, dark surfaces

Nessy Teal

#46A1A4

Primary brand color, links

Nessy Aqua

#8CD0CD

Mascot body, secondary fills

Loch Mint

#B9D5C4

Soft section backgrounds

Loch Cream

#EBE0C1

Warm light background,
reversed type

Harness Leather

#814F2F

Accent, cautions in docs

Harness Brass

#C99B5A

Buckles, highlights,
rare emphasis

MIX

About half warm neutral,
a quarter teal, the rest
deep teal and a sliver
of brass.

```
/* brand/palette/palette.css */
```

```
--nessy-deep-teal: #0A3644; --nessy-teal: #46A1A4; --nessy-aqua: #8CD0CD;
```

```
--loch-mint: #B9D5C4; --loch-cream: #EBE0C1;
```

```
--harness-leather: #814F2F; --harness-brass: #C99B5A;
```

Contrast: Deep Teal on Loch Cream and Loch Cream on Deep Teal both clear AA at body sizes. Nessy Teal and Harness Brass are display-only on light backgrounds — never set small body copy in them.

A warm serif, a sans that can hold code

Aa

Source Serif 4

Headlines and the wordmark itself. Bold weight, tight tracking. This is the font the Nussy logotype is drawn in, so nothing else may be substituted for it in the lockup.

Google Fonts · 400 / 700 · SIL OFL

Aa

IBM Plex Sans

Body copy, UI, tables, captions. It sits comfortably next to code and stays readable at 14px in docs.

Google Fonts · 400 / 500 / 600 · SIL OFL

Aa

IBM Plex Mono

Code, tokens, labels, version strings, taglines on social cards. Uppercase with wide tracking for section labels.

Google Fonts · 400 / 500 · SIL OFL

Harness your agents

Deck titles and hero headlines, 40–80px

Body copy runs 16px with 1.6 line height and a 60–70 character measure. Keep paragraphs short; docs readers scan.

MAVEN · io.nussy:nessy-core:1.0.0

```
// scale, in px
display 72 h1 44 h2 26 h3 20
body 16 small 14 label 12 / .18em caps

// never below
slides 24 print 12pt docs 14
```

Friendly about the monster, precise about the

framework

Nessy is a joke you get once and then stop thinking about. The mascot carries the charm so the writing doesn't have to. Docs should read like good docs.

DO

“Nessy runs your agent loop, tools, and retries. Bring your own model client.”

“Deep water, shallow API.”

Plain sentences. One loch reference per page at most, and only where it earns the space.

DON'T

~~“Dive into the depths of the loch and unleash the beast within your JVM!”~~

~~“Nessy is the revolutionary next-generation agentic paradigm.”~~

No monster puns stacked on top of each other, no hype adjectives, no exclamation marks in reference docs.

Naming

“Nessy” capitalized, never NESSY or nessy in prose. The package is `io.nessy`.

Pronoun

The mascot is she/her. The framework is “it”. Don't mix them in one sentence.

One-liner

“An agent harness framework for Java.” Use it verbatim in repo descriptions and talk abstracts.

What to grab, and from where

README hero	mascot/nessy-mascot-full.png
Standard logo	logo/nessy-logo-horizontal.png
Narrow placement	logo/nessy-logo-stacked.png
Badge only	logo/nessy-mark.png
GitHub avatar	icons/github-avatar.png
Favicon	icons/favicon.ico
Social preview	social/github-social-preview.png
Open Graph	social/open-graph.png
One-color print	monochrome/nessy-mark-single-color.png
Dark backgrounds	monochrome/nessy-mark-reversed.png

ICON SET

16, 32, 48, 64, 128, 256, 512 and a 1024 master.
Favicon bundles 16/32/48.

SOCIAL CARD

```
<!-- README hero -->
<p align="center">
  
</p>
```

Every mark in this kit is a crop of the approved mascot painting, not a hand-drawn vector. That is fine for repos, docs, avatars, and social. Before merchandise, large-format

print, or embroidery, have the badge redrawn as true vector paths and make that SVG the master.
